Data sources:

- Subtask 1.1: For data regarding Fleet and area variables census is used. In our Fleet vessel register all fishing vessels are included and it is updated regularly.
- Subtask 1.2: All vessels are obliged to fill in logbooks and we have data for all active vessels.
- Subtask 1.3: Data source for economic variables are socio-economic questionnaires that are sent to all fishermen and approximately 80 % of the questionnaires are returned. Some data are collected also with interviews with fishermen and from AJPES.
- Subtask 1.4: Source for effort variables are logbooks
- Subtask 1.5: Data for biological parameters are collected in accordance with EU legislation and the data are stored in biological database at FRIS.

Summary:

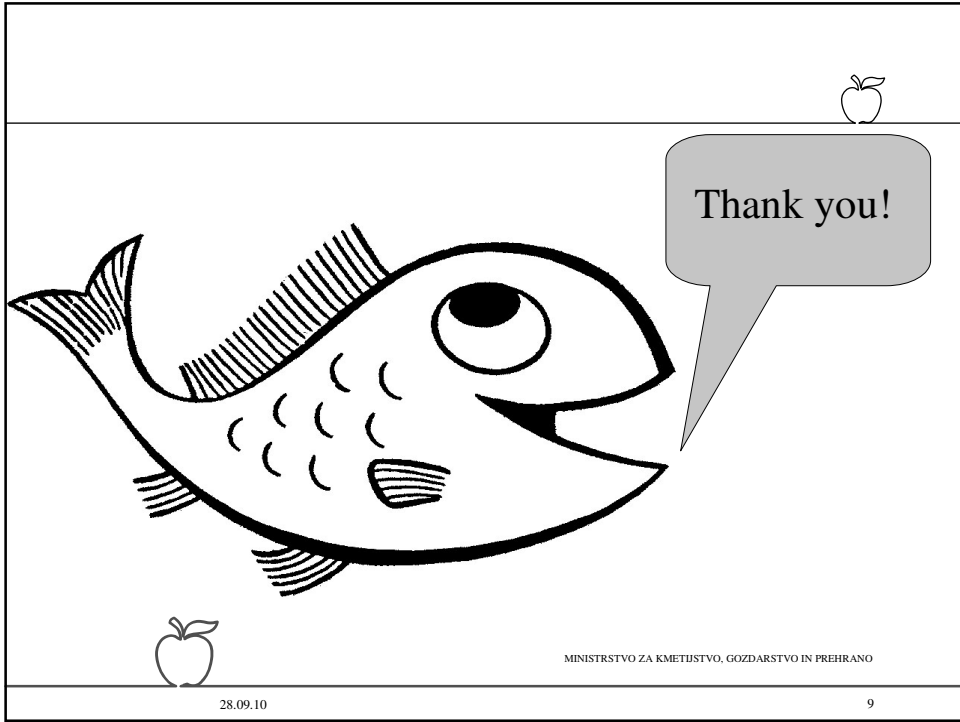

- Same problems like last year:
 - All required data are available.
 - Manually fulfilling the tasks and segmentation.
 - Differences between DCF and GFCM Task 1:
 - Segmentation, metier, operational units, ...
