About MedFisis

The MedFisis project aims at creating a Mediterranean Fishery Statistics and Information System, ...

[+MORE](#)

Background

The project became operational in September 2004 through a one-year agreement. ...

[+MORE](#)

Events

- ☐ **GFCM - Transversal workshop on Fishing Capacity** (Italy, Rome, 27-28 Sep 2010)
- ☐ **GFCM Workshop on Data Collection Methods** (29 September – 1 October 2010)
- ☐ **ISSCFG Group meeting** (19-12 October 2010 Rome)
- ☐ **SAC Sub-Committee on Statistics and Information** (29 November – 2 December, Malta)

the Mediterranean

Contents

1. Project Background
2. Documentation
3. Software
4. Tools (Built-in & Add-on)
5. Outputs (National, FAO, GFCM including Task-1, EU)
6. Technical assistance

Background – 2010

Review the Census, why?

- GFCM / EC progress and new requirements
- Changes in industry standards (since last version in 2005).
- Make it compatible with GFCM submission procedure (secured maintenance from GFCM).
- New application long-lasting, robust & flexible.

Outcome

- Previous versions:
 - Tailor-made for countries. International outputs not standardised (inducing errors)
- Current version:
 - Regional system built in: FAO, GFCM, EC consolidated (reducing errors in data communication, compatibility and error control).
 - Customization through: enable/disable components
- Final version (structure) for Mediterranean Sea.

Documentation – Survey Approach

“Design and Implementation of National Fishing Vessels Census”

Guidelines

- Addressed to national and international experts.
- Statistical Design: How to set up and launch a statistical survey
- Assessment surveys, Pilot surveys, Quality Check Surveys, Port surveys...
- Database structure and data elements
- Capacity building
- Examples of Quality Check Surveys

MedFis Project (Year 3) GCP/INT/918/EC

.....+ Software
User Guide
(in preparation)

Software

Characteristics

- Similar user interface (data entry)
- Similar set of compulsory data; except EC
- Similar querying

- Access → SQL Server
- Upgraded .NET framework
- Improved functionalities (user/reference management)
- Updated Reference Files (MedFisis, GFCM, EC, FAO FF-1)
- More capability for customization
- Data submission improved.

The screenshot shows the 'Fleet Register - test census' application window. It features a menu bar with 'Census', 'Fleet', 'Reference', 'Reporting', 'Exporting', and 'Users'. The main area contains a table with the following columns: Unique Registration Number, Vessel Name, Registration Number, Fishery Department Registration Number, Vessel Type, Home Port, Operational Status, Length, GT, and Power. The table lists six test vessels with various attributes.

Unique Registration Number	Vessel Name	Registration Number	Fishery Department Registration Number	Vessel Type	Home Port	Operational Status	Length	GT	Power
ALB22REG0001	test vessel	albania1	al001	Trawlers	Port 3	Operational	10.00	16.000	60.00
ALB22REG0003	test vessel 3	albania3	al003	Seiners	Port 4	Operational	8.00	18.000	60.00
ALB22REG0004	test vessel 4	albania4	al004	Long Liners	Port 3	Non operational	15.00	27.000	75.00
ALB22REG0005	test vessel 5	albania5	al005	Trawlers	Port 2	Operational	15.00	45.777	150.00
ALB22REG0006	test vessel 6	albania6	al006	Seiners	Port 3	Operational	5.00	8.000	

At the bottom of the window, there is a status bar showing '5 out of 5 vessels listed' and buttons for 'Delete Vessel', 'Modify Vessel', 'New Vessel', and 'Close Fleet'.

Technical Assistance

Lebanon - Objectives

- Review the Lebanese Fleet Register and validate census data
- Transfer of historical data into new software & customisation of the application to Lebanese needs
- Analyse the development of a Licensing System linked to the Fleet Register

Technical Assistance

Lebanon – Tasks carried out in Rome

- ✓ Revision of Questionnaire (national fields) and update of changes in the application. Translation of Questionnaire and Reference Tables into Arabic made available by Lebanon.
- ✓ Revision of Reference tables with addition of national fields appropriately linked to International Standard Classification.
- ✓ Definition of National Reference tables:
 - Recorders
 - Fishing Zones
 - Authorisation types
 - Ports
 - Minor Strata
 - Issuing offices

Technical Assistance

Lebanon – Tasks carried out in Rome

- ✓ Tested standard application.
- ✓ Suggestions & modifications carried out during customization.
- ✓ Most GT data missing: estimated GFCM:SAC11/2008/Inf.12.
- ✓ 50% GRT data missing: estimated through regressions.
- ✓ Historical data transferred to new customised application.
- ✓ DB structure & Reference tables → Inland Stratum & Non-fishing
- ✓ Further changes or modifications are feasible on demand.

Technical Assistance

Lebanon – Future Requests

- Creation of Read-Only version of application
- Definition of Inland Stratum & Sub-Set of Non-Fishing Vessels
- Creation of Fishing Licensing and Monitoring System linked to the Fleet Registry
 - Prototype: View-only & Licensing capability
 - Client-Server application: update of Fleet Register through Licenses
- Arabic version of the software is available through customization

Technical Assistance

Egypt

- Review of Questionnaire (fields) & Reference tables (+links)
- Define National Reference tables
- Customization of application & testing
- Translation of Questionnaire into Arabic

Albania

- Review of Questionnaire (fields) & Reference tables (+links)
- Define National Reference tables
- Customization of application
- Transfer of historical data & testing
