

Supplementary material on the methodology Part VIII

Structure of the spreadsheet for the collection of information on European eel monitoring frameworks currently in place in partner countries for the purpose of compiling the WP 2 monitoring database

Country	
Region	
Eel Management Unit code	
Do you have a monitoring on fish contamination in place? (Yes/No)	
If Yes, since what year?	
Is this monitoring linked to a regulation? (Yes/No)	
If Yes, what regulation?	
Does this monitoring include eels? (Yes/No)	
If No monitoring in place, did you have a contamination monitoring (including eels) in the past? (Yes/No)	
If Yes, what was the period of this monitoring? (Year start - Year end)	
Do you plan to have a monitoring in the future? (Yes/No)	
If Yes, what would be the period of this monitoring? (Year start - Year end)	
Who would be responsible for this monitoring? (Ministry, institute...)	
About the monitoring on fish contamination in place:	
Who is in charge of the monitoring? (Ministry, institute...)	
Is it compulsory? (Yes/No)	
If Yes, from which institute(s)?	
Where are the data? (Electronic files)	
What is the quality of the data?	
Owner of/Access to the data	
Aim	
Use	
End users	
Contact name and address to get access to the data	
On what spatial level are you recording the contamination data? Site (river, lagoon), river basin, fishers committee, region, country...	
What variables are compulsory?	
What variables are recorded in real	
Data series period of time - Start (mm/yyyy)	
Data series period of time - End (mm/yyyy)	
Record periodicity	
Missing data periods
